Projects

Zomato_Clone | Newton School ([link](#))

May 2023 - June 2023

Features :

- This is a near-by frontend clone of Zomato website.
- Gives the look and feel of the actual website.
- Users can navigate between the delivery, dining Out and night Life sections on the page.

Tech Stack Used : React, JSX, CSS

Description :

A near-by clone of Zomato website using React functional components, JSX and CSS. The Slider component in 'react-slick' library is used to achieve the image carousel. The responses of the API calls are stored into array objects and the array objects are used to display the information.

Movie-db Search | Newton School ([link](#))

May 2023 - May 2023

Features :

- Responsive movie search app.
- Uses TMDB API [API key - c52f69b47dea49c65a4205950bab64a1]

Tech Stack Used: HTML, CSS, JavaScript

Description :

A complete responsive app where user can search for the movies in the database using API calls. This app displays all the popular movies with the ratings and description. Users can search for any movie on the search tab and get the required details for the search.

Vastra - Responsive ecommerce website | Newton School ([link](#))

May 2023 - June 2023

Features :

- A complete responsive frontend design of a multipage ecommerce website.
- Includes login page, cart page, contact section, product page.
- Users can navigate to their desired section onclick.

Tech Stack Used : HTML, CSS, JavaScript

Description :

Fully responsive multipage ecommerce website. Displays multiple pages with a click on respective links.

Random Quote Generator | Newton School ([link](#))

April 2023 - April 2023

Description :

Generates and displays the quotes randomly along with the author name on button click.

Tech Stack Used : HTML, CSS, JavaScript and ReactJS.

Skills

Computer languages Javascript, Java, CSS, HTML

Software Packages React, Bootstrap

Additional Courses Taken Data Structure
